

## Drum Clamp

Drum Clamp - Forklifts are actually meant to lift, move and store products placed on pallets. For businesses which use drums, they usually need an attachment to be able to handle storing, lifting and moving them. There are some different attachments which a company can utilize for all your drum storing, lifting and moving requirements. These attachments are specially used to deal with drum containers - thus there is no risk of damage to the item or drum container when they are moved, lifted or stored.

### Drum Positioner And Grab

The drum positioner is existing in three and four tine models. They are utilized for the unloading and loading of drums off drum stands, racks and vehicles. This particular accessory is fully mechanical, therefore enabling the one operating it to be able to operate all from the comfort of the lift truck seat. Able to move large and extra large plastic drums, steel, its capacity is 210 liters. This particular attachment is designed for drum pyramid stacking.

The drum grab can be mounted to the forks, with a designed purpose of handling steel drums that have rolling hoops. Even if the original purpose for the design was to handle steel drums with rolling hoops, the drum grab could help accommodate plastic drums also. Drum capacity maximum is 210 liters for steel drums with rolling hoops and 220 liters for plastic drums.

### The Rotator

The drum rotator is a lift truck accessory that mounts on to the blades themselves. The objective of the drum rotator is to pick up the drum and turn it upside down. The drum fits in to the rotator using a steel clamp which fits over the center of the drum. The rotation is executed by either a continuous loop chain or a crank handle. The crank handle is designed for operations that take place below shoulder level. For operations that must occur higher than shoulder level, the continuous circle chain will be used.

Drum tines are simple fork mounted attachment which can be used for unstacking or stacking 210-liter metal drums. Stacking requires nothing intricate, merely simple horizontal placement of the drums. The carriage-mounted enhancements decrease the load center of the drums.

### Automatic Tongs

Drum tongs are accessible both automatic and semi-automatic models which could be utilized in the open topped and tight head metal drum kinds. The drum tongs can likewise be attached several various ways to the lift truck. One way is to connect them under a fork-mounted hook. One more way is to attach them to a fork-mounted jib or a carriage mounted jib. Either the semi automatic and the automatic have a drum capacity of 210 liters. With the automatic, there is no requirement for the individual operating it to ever leave the seat of the lift truck.

### Rim Grip Handler

The Rip Grip Drum Handler is the optimal alternative for lift truck attachments, when there is a necessity to store drums with limited space obtainable. This attachment could be used on either 120L and 210L drums. The Rim Grip Handler operates by utilizing metal jaws in order to grab the edge of the drum. It lifts the drum and puts it down without needing any room between the drums. The typical model used in the trade is a zinc-plated handler, though, this particular attachment comes obtainable in stainless steel for the food and drink market.
