

Electrical Parts for Forklifts

Forklift Electrical Parts - Forklifts could be purposely labeled to be used in hazardous sites. A labeled forklift indicates the design has met the lowest requirements of ANSI/UL 558 utilized for engine powered forklifts or ANSI/UL 583 for electric trucks for the type of label placed.

Applications for labeled trucks may be found in National Fire Protection Association NFPA 505 - Powered Industrial lift trucks including: Maintenance and Operation, Type Designations, and Areas of Use. Ask your local insurance provider and Fire Marshall for additional information regarding the permitted uses of industrial powered lift trucks in your application.

If the specific forklift satisfies the outlined standards, labels could be attached. A labeled lift truck would show the type of designation located on the nameplate and would have a correctly corresponding label attached.
