

## Barrel Clamp

Barrel Clamps - Known as "Barrel Clamp", this hydraulic accessory is actually used on forklifts so as to clutch objects which you would like to transport with the lift truck. Typically, they're used in order to barrels, handle kegs, and paper rolls, together with a few barrel clamp designs being able to rotate the cargo. Like for example, the rotate function permits the individual operating the forklift to put in a vertically stored paper inside the horizontal intake of a printing press.
